April 23rd, 2020 - Those differences didn't start with the B 17G as Douglas and Lockheed Vega came online during B 17F production. Each factory introduced distinctive details unique to their production lines. To complicate things further, many aircraft that were ferried to the UK for assignment were run through a depot that added different gun configurations to the nose compartment.

'B 17G Radio Equipment AirPages
May 3rd, 2020 - Navigational Radio Equipment. This equipment is designed to give the airplane lateral guidance during landing operations. It consists of a receiver which can operate on six tuned frequencies: 108.3, 108.7, 109.1, 109.5, 109.9, 110.3. A control box, antenna, and an indicator on the airplane's instrument panel.
